

ECON 1450

Consumer and producer surplus

Chapter 4

Today

- Exam overview/study strategies
- Chapter 4/Practice

Friday

- Remaining CH4 content
- Exam review (focus on CH3 & 4)

Exam 1: Chapters 1, 3, 4

- Monday, September 16 (entire period)
- Multiple choice, 30–40 questions
- **Bring:**
 - **Non-graphing** calculator
 - Pencil or pen
 - Thirst for adventure
 - 95 number
- **Not allowed:**
 - Phones, listening to music (sorry ☹), etc

Exam Prep Resources

- Brightspace / slides and resources
 - Recorded lectures/micro lectures
 - Practice examples and worksheets (CH3)
 - TA notes

The screenshot shows the Brightspace interface for the course ECON1450A: Principles of Microeconomics. The top navigation bar includes the University of Vermont logo, the course title, and various utility icons. Below this is a dark green navigation menu with links to Course Home, Content & Activities, Grades & Feedback, Course Tools, and Help & Resources. The main content area is titled "Chapter 3: Supply and Demand" and includes a search bar, a left sidebar with a table of contents, and a main list of resources.

Chapter 3: Supply and Demand

There's a lot of content to help support you!

Part 1: Shifts of the supply and demand curve

- BB practice activity "Supply and demand changes"
 - Video explanation of "Supply and demand changes" (2 parts)
- [Bonus online practice](#) with MRU (This is fun!)

Part 2: Equilibrium

- Lecture Video: [Equilibrium](#) (and in folder)
- Lecture Video: [Impact of multiple shifts](#) (and in folder)
- Lecture Video: [Demo of the magnitude of multiple shifts](#) (and in folder)
- BB practice activity, "Supply and demand shifts"
 - Video explanation of "Supply and demand shifts" (2 parts)

Review as much or as little as you need to feel confident that you've got this stuff down.

☐ Practice Quizzes

☐ Welcome to Achieve

☐ Math and Graphing Reviews

☐ Chapter 1: First Principles

☐ Chapter 3: Supply and Demand

Two worlds

You have been on it – reading textbook, attending class, doing homeworks. But, you want to make sure everything is fresh and you have no gaps

Most of us are probably somewhere in between

You've "brute force"-ed your way through assignments, have not opened e-book, attend lecture and feel like you mostly get it

One approach for Group 1

1. Make yourself a “cheatsheet” w/ formulas, labelled pictures
2. Work through chapter-specific practice quizzes in Achieve
 - Anything that takes you multiple tries, make a note and review that topic in textbook/etc
3. Sit down and take the “practice quiz” on BB (note that only CH 1, 3–5)
 - One sitting, check answers only at end, time yourself
 - Circle any question you’re not sure of
 - Check answers and list topics to review
4. Review content where you have holes, take notes
5. Repeat as necessary, review additional practice problems from HW/LC

One approach for Group 2

Practice problems are a good approach, but you will need to **make sure you review/read content as well**. Additional suggestions:

1. Watch microlectures and additional bonus videos (see BB)
 1. If you missed class, review recorded lectures
2. Read textbook + notes = good way to get vocabulary and concepts.
3. Read lectures slides and write on them (posted on BB)
4. Use the learning objectives at beginning of each section lecture notes to make sure you've covered everything

Additional suggestions *assuming infinite time*

Good things to do

Make your studying **ACTIVE**

Trick yourself to figure out what you secretly don't know
(metacognition: **know what you know**)

Active studying

When reading/watching, take notes

Watch lecture for 5 minutes. Pause. Write down a summary. Repeat

Talk yourself through problems/concepts out loud

When working through problems, use your hands

Draw and label diagrams

Make things

Cheat sheets

Labelled diagrams

Lists of terms

Types of example problems

Tricking yourself

Anything you can do to make yourself aware of gaps. Then you can fill them!

Take practice quiz start to finish w/o looking at answers or resources. Time yourself.

Work through Achieve practice quizzes in entirety before checking answers

Start with a blank piece of paper. Write down all the formulas/vocab you can remember

Try to make a cheat sheet w/o looking at resources
